[in LinkedIn](#) [GitHub](#) [Download](#)

Director of Software Engineering with 20+ years of experience leading engineering organizations, platform architecture, and AI-driven transformation in healthcare and e-commerce. Proven track record of scaling shared platforms that serve millions of members, modernizing legacy systems in the cloud, and applying generative AI to complex clinical workflows. Known for servant leadership, growing engineering talent, and driving measurable business outcomes.

SKILLS

AI / Machine Learning

Advanced

[generative ai](#) [llm & rag](#) [azure openai](#) |

WORK EXPERIENCE

Director of Software Engineering at Optum October 2022- Present

<https://www.optum.com/>

Lead technical architecture for Optum Behavioral Health, supporting 6+ million members. Own the shared API layer that powers 180+ web applications, including 30 critical (P1/P2) systems, and contribute to the CTO office to elevate engineering excellence and maturity across the organization.

- Spearhead AI/ML initiatives applying generative AI to utilization management (UM), modernizing clinical workflows and driving innovation in behavioral healthcare.
- Define architecture standards and governance for a shared API platform serving 180+ applications, including 30 priority 1 and 2 systems.
- Drive engineering excellence, talent growth, and engineering culture across the behavioral health division.

Software Development Manager at Amazon March 2021- October 2022

<https://buywithprime.amazon.com/>

Led a two-pizza engineering team implementing major changes to Amazon Buy with Prime, Amazon's flagship merchant checkout product.

- Partnered across Buy with Prime teams to build and onboard new solutions that raised the bar on shopper and merchant product discovery.
- Grew the development team to tackle complex problems in massively scaled retail solutions and prepared teams for future challenges.
- Owned critical, highly scalable systems, fostering innovation and attracting and growing engineering talent.

Senior Manager at CVS Health **November 2013- March 2021**

<https://www.cvshealth.com/>

Led 5 scrum teams with over 30 engineers across 5 locations, delivering medical and pharmacy benefit systems.

- Oncology regimen-based prior authorization: delivered an industry-leading, machine-learning-driven recommendation system for oncologists. Revenue-generation project that cut regimen prior authorization processing time from two weeks to minutes.
- Medical claim/rebate (EDI 837): revenue-generation project that saved clients over \$8 million per year.
- Prior authorization (NCPDP ePA, HL7 FHIR Da Vinci): simplified medical and pharmacy benefit prior authorization systems.
- Modernized medical claim editing by migrating Docker-based systems to Azure cloud.
- Eligibility (EDI 270/271) and provider portal systems with Azure AD certificate assertion and SAML 2.0 SSO - security and tech debt reduction.
- Established microservices Web API and API gateway strategy; stood up Elasticsearch/Kibana/Logstash clusters with PKI security.
- Founded a non-profit organization promoting STEM to youth.

Senior Technical Architect at Bluestem Brands Inc. **May 2003- November 2013**

<http://www.bluestem.com/>

Designed and developed enterprise system integrations (BizTalk Server 2010, BizTalk 2006R2, SSIS, .NET services and Web APIs), including custom BizTalk pipelines and an eConnect adapter for Microsoft Great Plains transactions.

- Built and enhanced enterprise customer business services, developing automated solutions for complex business requirements using XSLT-based mappings.
- Technologies: BizTalk, SSIS, SSRS, C#, Web API 2, Java, Spring Boot, JavaScript, jQuery.

Software Developer at Boombuy Inc. **January 2003- May 2003**

Developed web and database applications with Microsoft Site Server, Commerce Server, IIS, XML/XSLT, MSMQ, and .NET (Microsoft Passport and Wallet). Set up Source Safe version control, remote debugging, and SQL Server 2000 log shipping.

Software Engineer at AMAX Engineering Corporation **April 2001- January 2002**

<http://www.amax.com/>

Developed B2B and B2C websites using ASP, XML/XSLT, JavaScript, and SQL Server 7.0; integrated Site Server/Commerce Server search to build dynamic catalog search. Created and tested COM/DCOM components and implemented full-text search indexing.

EDUCATION

Master's Degree in Software Engineering (in progress) at University of St. Thomas

Bachelor's Degree in Electrical and Electronics at North China Electric Power University

INTERESTS

at Videography Photography
